Education

Drexel University

Expected Graduation: June 2030

Bachelor of Science in Software Engineering, Minor in AI & Machine Learning

Philadelphia, PA

- Relevant Coursework: Software Engineering & Development, Advanced Programming Tools & Techniques, Requirements Engineering, Computer Programming I–II, Computing and Informatics Design I–III, Calculus I–II

Experience

Associate Clerk

January 2024 – February 2025

Acme Markets

Philadelphia, PA

- Prepared 10+ online grocery orders per hour by optimizing picking and packing strategies, reducing order-preparation time by 50%
- Coordinated a team of 5 associates during peak shifts, processing 20 orders per hour and delivering in-store and curbside assistance, improving throughput
- Resolved customer questions through a support hotline by processing refunds, cancellations, and order corrections

Projects

Postal | *Python, OpenAI API, Rich, Pydantic* | [Source Code](#)

June 2026 – Present

- Engineered a Python CLI coding agent using object-oriented architecture, streamed model responses, syntax-highlighted output, and an interactive prompt loop; the harness is now used by 5,000+ developers via pypi stats, and GitHub stars
- Designed a tool-calling system for file I/O, shell operations, and web search that delegates tasks across 5+ sub-agents and retains persistent memory, reducing manual intervention during long sessions
- Integrated a Model Context Protocol (MCP) layer allowing the agent to execute tools remotely through established MCP servers, extending its capabilities beyond built-in functions

Food Truck Finder | *Python, Flask, SQLAlchemy* | [Source Code](#) | [Live Site](#)

Jan 2026 – June 2026

- Built a food-truck discovery and review app as a full-stack developer on a 5-person team, developing backend routes, relational models and frontend UI/UX across 5 Agile sprints with defined user stories
- Designed RESTful API endpoints and SQLAlchemy models for a 1–5 star review and favorites system, with server-side input validation and automated rating aggregation
- Implemented server-side validation enforcing rating bounds (1–5) and required fields, and computed average ratings by recalculating on each new submission

Technical Skills

Languages: Python, Go, C, JavaScript, SQL, HTML5, CSS3

Developer Tools: Git, GitHub Actions, Linux, Docker

Libraries/Frameworks: Flask, SQLAlchemy, pytest, OpenAI API, Pydantic

Concepts: Full-Stack Web Development, RESTful API Design, CI/CD, Unit Testing, Relational Database Design, Object-Oriented Programming, Functional Programming, Version Control, Agile Methodology
